

Daysy:
Your personal
fertility tracker.

Daysy tells you exactly
when you are fertile and
when you are not.

Now with
Bluetooth®

daysy®

Love Your Body

Daysy is simple and informative

Every morning, you measure your basal body temperature under your tongue for just 30-60 seconds. Daysy immediately evaluates your cycle data and shows you if you are fertile or not.

Daysy is reliable and precise

With an intelligent algorithm based on scientific evidence, long-term experience and well-engineered technology, Daysy provides the highest quality, precision and reliability in fertility tracking.

Be completely natural and in harmony with your body.

Daysy has its own app

This provides further options to digitally enhance your knowledge regarding your cycle and body, and to share this information with your partner or doctor.
